PROGRAM WEBINAR

CMAA presents Aviation Construction, Reaching New Heights with a focus on Regional Airports

Wednesday, September 28, 2022 • 9:30am-10:30am • Virtual

PROGRAM SUMMARY

The FAA currently predicts an increase from 700 million to close to 1 billion passengers in the next 10-15 years. It is crucial that our regional airports are prepared and ready for this dramatic increase in passenger traffic. LAX is focused on the 2028 Olympics and has several billions of dollars in construction already underway. What about the regional airports? Let's welcome Long Beach, Hollywood/Burbank, Ontario and Palm Springs airports, and hear how they plan to accommodate the impending increase in demand.

EMCEE
