AVAILABLE**

PROGRAM SUMMARY

Decarbonization is an important step towards mitigating climate change and reducing our overall greenhouse gas emissions. This webinar will address a responsible approach to achieving decarbonization in a campus setting. The goal of this webinar will be to educate and inform attendees about the technologies, policies, and strategies for achieving low-carbon designs and reduction in greenhouse gas emissions. Topics will include energy efficiency, renewable energy, storage systems, electric vehicles, and the importance of focusing on reducing embodied carbon emissions. The webinar will also address SCE utility commitment to decarbonization navigating the Pathway 2045 efforts by promoting electrification of buildings and transportation, renewable energy sources, energy efficiency, and carbon capture and storage.

SPONSOR LEVELS
