SUSTAINABILITY WEBINAR

Healthy and Sustainable Campuses in the Age of Covid 19 and the Climate Crisis

Tuesday, February 8, 2022 • 1:00pm - 2:00pm • Virtual

PROGRAM SUMMARY

Covid 19 and Climate Change have compelled the higher education sector to address the intersection of healthy indoor environments, sustainability, and wellness at an unprecedented scale. As campuses continue on the path toward reopening, how can they best support the social, emotional, and academic success of their students while also upholding sustainability on their campuses? How can we better understand this challenge by investigating it through three scaled 'ecosystems': the surrounding environment, the building, and the human body?

Join us to learn about:

- How harnessing the intersection between health, wellness and sustainability bolsters a campus to best respond to the challenges of Covid19 and the Climate Crisis.
- Healthy building strategies that can be employed in the design process.
- Campus health and wellness programs that can promote occupant wellness.
- The synergy between occupant comfort and sustainable building performance.

EMCEE

Farrah Farzaneh, CCM, Assoc. DBIA, LEED AP BD+C, ENV SP
Director of Facilities Planning, San Bernardino CCD

MODERATOR

Eera Baktiwale, LEED AP BD+C
Director of Sustainability, Mt. San Antonio College

SPEAKERS

Angela Spangler, MS, WELL Faculty, AEP
